CONCRETE

Placement
Repairs
Polished concrete
Exposed concrete

3.

ACID AND WATER PROOFING

Parking decks
Pump applied linings
Acid process linings

4.

SPECIALIST JOINTING

Joint nosing repair
Radflex joints
High traffic jointing
High performance jointing

5.

DRAINS

Open channel drainage systems

6.

KERBS

Protective kerbs
Hygienic kerbs

1. FLOORING

Nuvo Flooring offers an innovative approach to flooring and associated flooring elements.

We pride ourselves in the constant development of new and creative solutions to meet our customer's needs.

HIGH PERFORMANCE INDUSTRIAL FLOORING

We pride ourselves at offering high performance specialist flooring using materials such as epoxies, urethanes, advanced grouts, concrete and poly-urea's.

We have established a number of unique methods that allow us to create floors suitable for a variety of environments. We cover systems for a broad spectrum of industries and have solutions for:

Factory Flooring

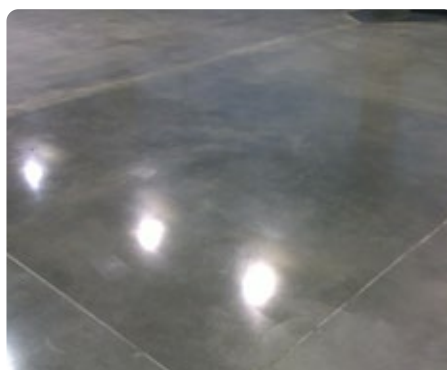

High Wear Flooring

Impact Resistance Flooring

Hygienic HACCP Approved Flooring

Acid- and Chemical Resistant Flooring

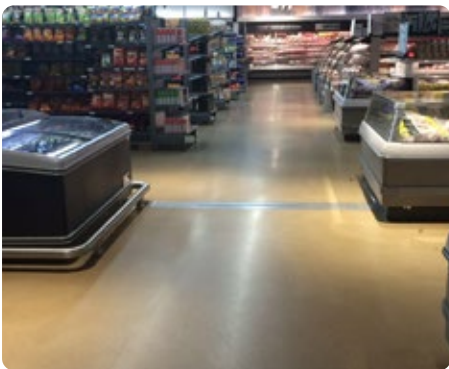

Anti-Slip Industrial Flooring

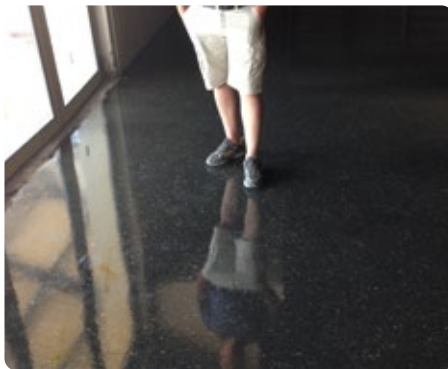

SPECIALIST RETAIL FLOORING SOLUTIONS

As a suprisingly aggressive environment, retail flooring needs to be beautiful, robust and serviceable.

Retail

Public Spaces

Hygienic HACCP Approved Flooring

Show Rooms

Commercial Spaces

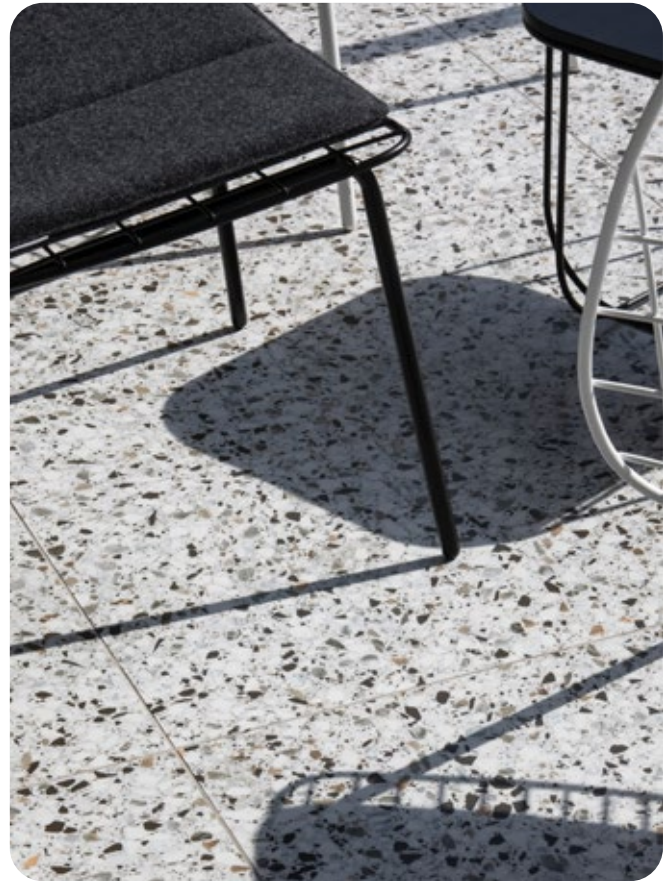

Specialist Residential

TERRAZZO FLOORING SYSTEMS

Terrazzo is an Italian derived handcrafted flooring system that is both durable and luxurious.

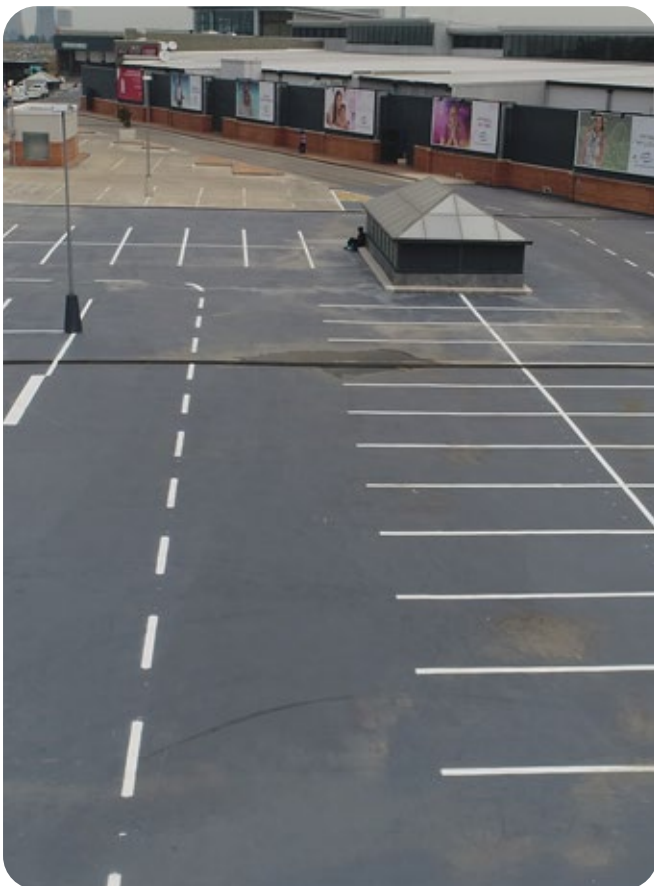

This flooring system is ideal for public spaces, including airports, hotels and cultural and social institutions. It is ideal for clients who are looking for a luxurious touch with the advantage of being very robust and low-maintenance.

PARKING DECK COATING

Our parking deck linings allow for the very high impact that public parking spaces are generally associated with, in addition to the ability to withstand high traffic.

Our system has additional protective layers to shield the waterproof aspect of the system from the harsh African sun, and is adaptable to nearly every parking environment from public spaces to receiving bays.

2. CONCRETE

Concrete forms the basis of the vast majority of the surfaces we make use of every day. We offer a turn key approach to the placement and treatment of concrete.

REPAIRS

Our specialist knowledge on repair materials has enabled us to successfully repair extensive damage on concrete caused by rain damage, excessive wear and etching, to name a few.

POLISHED CONCRETE

Our experience ranges from Top Billing featured homes to Scientific labs with a very particular brief, retail specific finishes and high performance warehouse finishes, to name a few.

PLACEMENT

With thousands of square meters of concrete placement having been done, we have successfully completed standard decks, coffer decks, surface beds and high tolerance floors. We also specialize in specialist placement for polished and exposed applications

LEVELLING

Our expertise in high performance grouts, specialist leveling and placement techniques has allowed us to provide solutions where levels are rectified, if it means simply creating a level floor or inducing levels to manage water flow, we have the solution.

GRINDING

We have invested heavily into our grinding equipment, our fleet of grinders are capable of handling any grinding application, including preparation of concrete to receive a new coat of paint, removal of old paint, level rectification by grinding or resurfacing, to name a few. We have grinding covered.

EXPOSED CONCRETE

Exposed concrete is achieved through a specialized and technical application of concrete and retarders to yield an exposed aggregate finish ideal for outdoor applications. We have taken it one step further in perfecting a 3 stage process which gives a smoother more refined final product while remaining anti slip

3. LININGS

Our skilled teams use only the best acid- and water proofing methods.

OUR SOLUTIONS INCLUDE:

Parking decks	Waste Water
Tank Lining	Containment and
Wall Insulation	Management
Pipe Coating	Secondary Containment
Roof Insulation	Galvanised and
In-Plant OEM	Asbestos Cladding
Rim and Band Joist	Restoration
Potable Water Tanks	

4. JOINTING

As approved specialist joint applicators we pride ourselves at being able to meet the needs of our clients through a wide range of application.

OUR SOLUTIONS INCLUDE:

Joint repairs
Mechanical Retro Fitted Joints
Quick Setting Jointing
Polysulphide Jointing
Non-Moving Joint Filler
Moving Joint Sealant
Chemically Resistant Sealant
Polyurethane Joint Sealant
Highway Structural Sealant
Trafficable Waterproofing Joints.

5. DRAINS

We manufacture and install stainless steel drain solutions that integrate seamlessly into our existing flooring systems and floor levelling where needed.

Our drains allow for better transitioning of forklifts, pallet jacks and traffic in general. Paired with several fibergrate options that are easily removed for cleaning, we have a hygienic and practical solution for any drain requirement.

6. KERBS

Our unique Kerb solutions provide hygienic wall protection suitable for the food and beverage industry and are particularly beneficial where ISO panels are present.

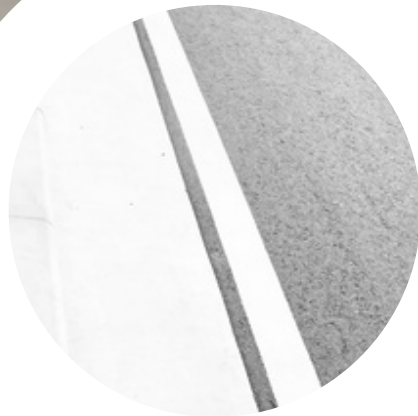

Our kerbs provide robust, reinforced protection that integrates seamlessly into all floor finishes.

OUR CONCRETE KERB SOLUTIONS ARE:

- Impact resistant
- Hygienic
- Water resistant
- Chemically resistant
